TITLE Aquatics for the Impaired, Disabled, and Handicapped. Information Sheet.

INSTITUTION American Association for Health, Physical Education, and Recreation, Washington, D.C.; Council for National Cooperation in Aquatics, Washington, D.C.

SPONS AGENCY Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

PUB DATE Aug 72

GRANT OEG-0-72-5454-233563

NOTE 31p.

EDRS PRICE MF-\$0.65 HC-\$3.29

DESCRIPTORS *Annotated Bibliographies; Athletic Activities; *Handicapped; *Physically Handicapped; Recreational Activities; *Swimming

IDENTIFIERS Aquatics

ABSTRACT

This document is a 107-item annotated bibliography, arranged alphabetically by author, on aquatics for the impaired, disabled, and handicapped. The range of the bibliography covers books and journal articles primarily from the late 1960s and early 70s, though there is material from as early as 1936. There is a subject index. Listed in addition to the bibliographic entries are personal sources of information, associations and foundations, films, and periodicals and other items that might yield information on the topic. Participants in the Council for National Cooperation in Aquatics Closed Workshop

Yale University, November, 1971

Chairman: Michael M. Rand, National Jewish Welfare Board, 15 East 26th Street, New York, New York

Co-Chairman: Grace D. Reynolds, Director of Special Services, YMCA of S. W. Washington, Longview, Washington, 98632

Jeanne Ackerman, 6117 Tilden Lane, Rockville, Maryland, 20852

June Braaten, Advisor Recreation and Camping, Ontario Association for Retarded Children, Suite 300, 77 York Street, Toronto, Ontario, Canada

Bill Engles, Human Resources Center, Albertson, New York, 11507

Susan Grosse, Gaenslen School, 1301 E. Auer Avenue, Milwaukee, Wisconsin, 53210

Alexander Houston, Program Specialist, American National Red Cross, 17th & D Streets, N.W., Washington, D.C., 20001

Susan Johnson, Programs Staff, Programs for the Handicapped, YMCA of S. W. Washington, Longview, Washington, 98632

Dan Meehan, Denver Red Cross, 170 Steele Street, Denver, Colorado, 80206

Judy Newman, Director of Physical Education and Swim Therapy, Recreation Center for the Handicapped, Great Highway near Sloat Blvd., San Francisco, California, 94132

AAHPER Staff:

Julian U. Stein, Consultant to Programs for the Handicapped at AAHPER

Wanda Burnett, Program Assistant, Programs for the Handicapped

Introduction

Various physical and recreational activities can be used effectively for diverse purposes in education, recreation, habilitation, and rehabilitation programs for impaired, disabled, and handicapped individuals of all ages and descriptions. Swimming and aquatic activities have been especially well received by these groups. Many persons working in these areas seek additional information and materials about exciting and productive experiences of others, their success stories, and their promising practices. This Information Sheet on Aquatics for Impaired, Disabled, and Handicapped has been developed to help interested individuals learn of what others have been doing, locate personnel and material resources, and to obtain additional assistance to help them with their programs and activities.

This Information Sheet is an expansion and extension of the Annotated Bibliography: Swimming for the Handicapped developed by Susan Grosse, J.F. Ganselen School, Milwaukee, Wisconsin, and distributed by the AAHPER Unit on Programs for the Handicapped. Additional information was gathered and contents of the Information Sheet developed by a committee that participated in a special closed workshop sponsored by the Council for National Cooperation in Aquatics at Yale University in November 1971.

The Information Sheet has been completed and is being distributed as a service of the AAHPER Information and Research Utilization Center in Physical Education and Recreation for the Handicapped under a grant from the Bureau of Education for the Handicapped (Department of Health, Education, and Welfare).

The project presented or reported herein was performed pursuant to a Grant from the U.S. Office of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the U.S. Office of Education, and no official endorsement by the U.S. Office of Education should be inferred.

Annotated Bibliography

1. Abramson, Richard A. The Effects of Three Training Techniques on the Swimming Abilities of Trainable and Educable Mentally Retarded Children. Unpublished Research Study. Waterville, Maine: Colby College; 1971.

The purpose of this study was to determine whether or not an essentially non-verbal teaching technique would be more effective than an essentially verbal technique when teaching swimming to children of lower verbal ability (TMR, EMR). They found no significant advantage to the non-verbal technique. However, data suggests more research is needed in this area.

2. Ackerman, Jeanne. "Using Movement-Exploration in the Swimming Pool With Mentally Retarded." Journal of Health, Physical Education, and Recreation, October 1971.

The problem solving approach is applied to activities in the water to help children improve locomotion, balance, spatial awareness, and force. Included are specific activities for the child as well as suggested methods for presentation. Background information on movement exploration is also cited.

3. American Association for Health, Physical Education, and Recreation. A Guide to Programs in Recreation and Physical Education for the Mentally Retarded. Washington, D.C.: the Association, 1968.

This publication is a guide for general recreation and physical activity programs for the mentally retarded. Specific swim activity is mentioned as it pertains to the objectives or values of activities being discussed.

4. A Practical Guide for Teaching the Mentally Retarded to Swim. Washington, D.C.: the Association and the Council for National Cooperation in Aquatics, 1969.

Developed to help fill the gaps in instructional and recreational swimming programs for the mentally retarded, this guide is a composite of the ideas and experience of many individuals who have taught the mentally retarded to swim. It incorporates the successful, the practical, and the functional into a flexible and workable resource. This Guide has been designed for professionals and volunteers, for individuals with little or no background or experience with the mentally retarded, for those with minimal swimming and aquatic experience, and for personnel with little background in either area.

5. "Learning to Get Along in Water." Journal of Health, Physical Education, Recreation 37: 35-36; April 1966.

This article deals specifically with swimming for the mentally retarded and includes a letter to parents of prospective students, a letter asking for instructors, and a list of suggestions on teaching retarded children.

6. American Association for Health, Physical Education and Recreation. Recreation and Physical Activity for the Mentally Retarded. Washington, D.C.: the Association, 1966. Chapter VIII, "Aquatics", pp. 50-52.

A brief consideration of the value of swimming for the retarded along with general guidelines for program development.

7. American Red Cross. Swimming for the Handicapped. Washington, D.C.: American Red Cross, 1955.

This instructor's manual includes chapters on aims, values, and objectives; facilities and equipment; the handicapped in general; specific handicapping conditions (amputations, paralysis, cerebral palsy, sensory disabilities, cardiac cases, mental illness, and mental retardation). Each section contains suggestions for teaching. Sample information forms for admitting pupils to the program are included.

8. Anderson, William. Teaching the Physically Handicapped to Swim. New York: Transatlantic Arts, Inc. (565 Fifth Avenue), 1968.

This publication is primarily for the guidance of teachers of swimming, physical therapists, physical educators, and others concerned with the disabled. The methods described are those which have been used successfully and effectively by the author during over twenty years of teaching the physically disabled. The contents are practical, functional, and have produced remarkable and gratifying results. Detailed descriptions of activities, methods, and procedures are an important section; many illustrations emphasize and reinforce the printed material. Case histories of students with a variety of disabilities are included as examples of the author's approaches.

9. Belenky, Robert. A Swimming Program for Blind Children. New York: American Foundation for the Blind (15 W. 16th St.), 1955.

This is a booklet based on experiences of author as swimming instructor in a camp for blind children. It contains an outline of swim program, an example of one successful camp waterfront, and teaching methods (a progression for blind beginner, instruction for novices and swimmers). Miscellaneous topics included are, braille and large print bulletin boards, swim records, search parties, and camper assistance.

10. Berg, S.E., and Gardner, W.E. "Therapeutic Pool Heals and Thrills Crippled Children." American School Board Journal 99: 23+; December 1939.

This article is based on the swimming program at Freeman School, Rockford, Illinois. Included are a brief description of the exercise and lesson

program, information about constructing their pool, and a good set of rules for pool use. This material is not relevant to exact teaching situations but will be valuable to someone establishing a swimming program for the handicapped. The general orientation of the article is therapeutic rather than skill developing.

11. Birmingham Area Chapter, American Red Cross. "Sun Dance Inside' After Work with Retarded Children." Salute. July-August-September 1966.

A very brief description of the swim program conducted by the Birmingham Red Cross in conjunction with the Opportunity School Center there.

12. Bleasdale, Noel. "They May Also Be Olympic Swimmers." Swimming Times 41:12:470; December 1964.

This article mentions the Paralympic Games (for the physically handicapped) and describes the Wallasey and District Swimming Clubs in England, which produce swimmers who have competed in these games. Information includes desirable physical facilities, medical information to be obtained from prospective swimmers, and general adaptation of common strokes to the handicapped.

13. Braaten, J., and Lee, I. Swimming Program for the Trainable Retarded: Guides I, II, and III. Toronto, Ontario, Canada: Canadian Association for Retarded Children, nd.

This is a set of teaching manuals containing information concerning organizing, administering, and conducting programs, including lesson plans, testing, and recognizing the achievement of participants.

14. Brooks, Judith. "What you See Happening is Called HOPE." Challenge 7:3; January-February 1972.

A description of the swimming program for retarded and physically handicapped children held at the Trudeau Center, Warwick, Rhode Island. It contains information on organization of their program as well as short individual case histories of participants. It stresses what can be accomplished through swim instruction.

15. Brown, Richard L. Swimming for the Mentally Retarded. Arlington, Texas: National Association for Retarded Children, September 1958.

A booklet containing detailed information on swimming for the retarded. Included is consideration of the various levels of retardation, values of swimming for the retarded, objectives for the program skills to be taught, and many teaching suggestions.

16. Brown, R. L. "Swimming Activity for the Handicapped." Journal of Health, Physical Education, Recreation 24: 14-15; April 1953.

This article distinguishes differences between swimming and hydrogymnastics and enumerates specific advantages of swimming. Included are skills that

should be taught to the handicapped and stroke modifications. Consideration is given to special attitudes needed by teachers of the handicapped. Information is given about a community swimming program.

17. Canadian Red Cross. Teaching Swimming to the Disabled. Toronto, Ontario, Canada: Canadian Red Cross, 1969.

General tips on teaching the blind to swim, including suggested water temperatures, water games, water safety measures in the pool, and general health and safety suggestions. A section on the values of swimming for the blind is also included. Attention is given to teaching techniques for the TMR, learning disabled, and the hard of hearing. Sample forms for obtaining medical history and achievement progress records are a part of this publication. Brief mention of disabilities, definition, description, classification and common characteristics is made for these conditions--mentally retarded, physical disabilities, blind, partially deaf.

18. . Water Games and Individual Figures for the Handicapped. Toronto, Ontario, Canada: Canadian Red Cross, nd.

Water games and individual figures, shallow water games, deep water games, water games for beginner, intermediate, senior swimmers, advanced are all included. They emphasize participation by activities that are challenging but also fund.

19. Casady, Donald R. Swimming Programs for the Mentally Retarded. Iowa City: University of Iowa, March 1968.

This is an adaptation of the booklet, Swimming for the Mentally Retarded by the National Association for Retarded Children. Additional here is a brief description of each of the swimming skills included in the earlier manual.

20. Cass, Maurice. Recreation for Blind Adults. Springfield: Charles C. Thoas Publisher, 1966.

General benefits of swimming and activities that should be included in a swimming program for the blind are discussed. Material on swimming is quite general; however, some more detailed information on SCUBA diving and water skiing for the blind are included.

21. Connecticut Society for Crippled Children. Report on the Third Institute on Swimming for the Physically Handicapped. New Britain, Conn.: the Society.

This is a collection of reports and speeches given at the Institute. Most articles are concerned with the values of swimming programs for the handicapped.

22. Council for National Cooperation in Aquatics. Swimming and Diving: A Bibliography. New York: Association Press, 1970.

A comprehensive, unannotated bibliography serving as a guide to written materials and films in areas of swimming, diving, skin and SCUBA diving,

water safety and facilities. -It includes books, periodicals, unpublished research and films.

23. Daniels, E.S., and Davies, Evelyn A. Adapted Physical Education. Second Edition. New York: Harper and Row, 1965.

A chapter deals with the general values of aquatic programs for the handicapped along with organizing and conducting these programs within the school physical education curriculum.

24. Davis, Ernie. "Fresh Approaches for Combating Persistent Problems." The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

He states a good case for the re-evaluation of methods and materials used in teaching the retarded to swim. Included are some especially good ways of getting the child used to the water. Diagrams and detailed explanations are used in the examples, making them easy to follow and understand.

25. DeBonis, Edith. "Water Activities for Children with Perceptual Motor Problems." Aquatics in the 70's. Pelham, N.Y.: Council for National Cooperation in Aquatics, November 1970. (Available through the American Association for Health, Physical Education and Recreation).

A discussion of the significance of water activities for children with perceptual motor problems. Consideration is given to the specific areas of development in which these children may be impaired, along with information on how swimming can be of value.

26. _____. "Water Activity to Combat Perceptual Motor Problems." The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A description of a program of aquatic activities designed "to help children move more efficiently, rather than to teach them to swim." Geared to the child who has perceptual motor problems, the article includes short descriptions of creative movement problems and selected games and stunts performed both with and without equipment. These activities can be used with the non-swimmer as well as the swimmer.

27. Diemer, Franklin. "Swim Program" ICRH Newsletter 2:2; August 1966.

A description of the swimming program for physically handicapped children sponsored by the recreation department of Tonawanda, New York. Included is a discussion of the value of swimming, along with a brief outline of their program set-up.

28. _____. "Tonawanda Program is Outstanding." ICRH Newsletter 3:11; May 1967.

A description of the summer swim program for retarded children sponsored by the Tonawanda, New York recreation department. It includes several ideas for helping children adjust to the water during the first few lessons.

29. "Dome Protects Swimmers in Pool for Handicapped." Data and Reference Annual. Fort Lauderdale: Swimming Pool Weekly, 1972.

This article describes a pool constructed specifically for use by the physically handicapped. A particular feature is a Crystogon Dome which can be closed over the pool or opened to shade play areas.

30. Engle, John. A Swim Program Effective for Children with Perceptual Disabilities. Oshawo, Ontario, Canada: the author, 97 Wayne Street, 1970.

A description of the area of perceptual disability and its resulting effects on the ability to learn to swim. It includes specific information on types of perceptual problems and lists activities to aid the remediation of these problems while improving swimming skills.

31. Fait, Hollis. Special Physical Education; Adapted, Corrective, Developmental. Second Edition. Philadelphia: Wm. B. Saunders Co., 1966.

Included are teaching methods for the handicapped in general and detailed discussion of swimming for specific handicapping conditions as blindness, deafness, cerebral palsy, orthopedic problems, and emotional disturbances. Consideration is also given to the fear of the water exhibited by the handicapped.

32. Ferguson, R.S. "Water Safety for the Physically-Handicapped." Journal of Health, Physical Education, Recreation 20:317+; May 1949.

This outlines a project at Seaside Sanatorium (Connecticut) involving children of all ages handicapped by tuberculosis of the bone. Examples of the types of children helped, problems which arose, and general comments on the process of learning to swim of these children are included.

33. Foster, Robert E. "Swimming Activity Opens a New World for Retarded Youths." Swimming Pool Age. September 1967.

A description of the swimming program at the Stewart School for Trainable Mentally Retarded Children, Las Vegas, Nevada. Included is a justification for the program, objectives, organizational set-up and a consideration of the benefits to the students.

34. Gabrielsen, M.A., Spears, B., and Gabrielsen, R.W. Aquatics Handbook. Englewood Cliffs, N.J.: Prentice-Hall, 1960.

A chapter delineates the values of swimming for the handicapped, organization of the program, specific handicaps and their relation to swimming, and includes samples of two charts (one for physician's recommendations and one for pupil progress).

35. Garrett, Hayward. "Swimming for the Handicapped." Illinois News: Health, Physical Education and Recreation 13:3 May 1966.

A listing of two important considerations when teaching the retarded

physically handicapped how to swim. They are methods of instruction and skills to be taught.

36. "Get Them in the Swim." Mental Retardation News 20:3; March 1971.

Contains short descriptions of several successful programs of swimming for the retarded. Included are comments on where each program received community support, discussion of the value of swimming for the retarded and brief statements of the results of their efforts.

37. Gober, Bill. "Swimming for Trainable Retarded." Challenge 3:5; May 1968.

Their program is based on the theory that a definite relationship exists between the attainment of physical skill and an increased awareness and proficiency in academic activities. Included in the article is an outline of the organization of their program in DeKalb County along with a description of the techniques they use.

38. Grosse, Susan J. "Adapted Swimming." The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A listing of suggested adaptations in techniques, equipment, and/or facilities for teaching swimming to children with a variety of handicaps. Included are the auditorally impaired, learning disabled, mentally retarded, emotionally disturbed, physically handicapped and visually impaired.

39. . "Small Craft Safety: A Valuable Addition to Your Swimming Program." Challenge 7:5; May-June 1972.

A description of a unit on small craft safety which was included in the swimming for physically and multiply-handicapped children at the F. J. Gaenslen School in Milwaukee, Wisconsin.

40. Grove, Frances. "Aquatic Therapy: A Real First Step to Rehabilitation." Journal of Health, Physical Education, and Recreation, October 1970.

A description of the program at the Pacific State Hospital, Pomona, California. Both the therapeutic and recreational values of swimming for the handicapped are discussed. Emphasis is on participation for all at what ever level of ability or degree of handicap the person has. Consideration is also given to teaching methods and equipment used.

41. Grutzmacher, Jean. An Evaluation of 3 Experimental Methods of Teaching Swimming To Blind and Partially Sighted. Doctoral dissertation. Columbus: Ohio State University, 1960.

Describes the use of water games, floatation devices, and music as techniques for teaching blind. Comparisons of methods and effective use.

42. Hausman, R.M. Swimming for Emotionally Handicapped Children. Department of Special Education, University of Hawaii, nd.

A study designed to test the efficacy of a swimming program for a small group of three seriously disturbed children in terms of group cohesiveness, physical development and swimming ability. Their basic method was indirect instruction with the primary emphasis on the development of socialization skills. Information regarding skills developed and evaluation procedures is also included.

43. Hoskin, Alvin D. "Rec Head Studies Pool Ideas." ICRH Newsletter 3:6; February 1968.

An excerpt from a longer report by the Long Beach, California, Recreation Commission done to investigate the feasibility of a proposed swimming pool for the handicapped. An excellent source for those having to start a program in the very beginning. It brings out the many factors which need to be considered before the actual program begins.

44. Hayden, Frank J. "Getting in the Swim." ICRH Newsletter 1:4; October 1965.

A brief discussion of the values of swimming for the retarded, and outline of what should be included in an aquatic program and several hints on teaching techniques. Especially valuable for those who are just starting a program.

45. Herdie, James F. "Swimming for the Handicapped Children." Recreation. 84-85; February 1955.

This article describes a swimming program for the handicapped in Manchester, Connecticut. Included are information and procedures about initial parent contact, pupil screening, pool facility adaptation, staffing, and class scheduling.

46. Humbert, Carol. "YWCA Aquatic Classes for Michigan Handicapped." Data and Reference Annual. Fort Lauderdale: Swimming Pool Weekly, 1972.

This article contains a description of the development of a swimming program for trainable retarded children attending Gard School, St. Joseph, Michigan. Included is the rationale behind the program, as is the assumed values for the participants. Particular to their program is the use of floatboards as aids to buoyancy and skill development.

47. Hunt, V.V. Recreation for the Handicapped. Englewood Cliffs, N.J.: Prentice-Hall, 1955.

A general listing of swimming activities for all handicapping conditions along with special safety precautions for the blind are provided.

48. Jarvis, Jack. "Seattle Swim Meet is an Annual Event." ICRH Newsletter 3:11; May 1967.

A description of an annual invitational swim meet for handicapped children put on by the King County Park and Recreation Department. A brief outline of the organization of the meet is included along with some comments on the value of competition for the handicapped.

49. Jirka, Rudolf R. "Effects of Ten-Week Self-Development Fitness Program Through Swimming (for Mentally Retarded Adults)." Journal of Physical Education 66:5: 150-151; May-June 1969.

This describes a project designed to identify, evaluate, and document the effects of aquatic activities upon motor fitness through increasing proprioceptive input which is basic to the development of self-image in mentally retarded adults. The program included land activities as well as swimming sessions; no specific information on the exact type of swim activity is given.

50. Johnson, Helene. "Hey! Watch Me!" Youth Reporter (Birmingham American Red Cross), October 1966:

A brief commentary on the personal satisfaction the author received while working with mentally retarded children during a summer swim program. It provides some insight into the psychological values of such a program for both the students and the teachers.

51. Kaiser, Dave. "City Equips Swim Center for Handicapped Persons." Swimming Pool Weekly, March 23, 1970.

A detailed description of the community oriented program of swimming for the handicapped developed in Long Beach, California. Particularly useful is the information on the adaptations they made in the pool facility. The article includes pictures of this equipment in operation. Their organizational plan is also included.

52. Kamm, Alfred. "Swimming as an Activity Therapy." Mental Hygiene 33:3; July 1949.

Written to orient therapy personnel to the operation of a swimming program for their patients, it includes some basic information on pool operation along with specific adaptations needed for the handicapped. Also listed are a number of suggestions for program operation and a skill progression for non-swimmers.

53. —Keffer, Louise. "Introduction to Swimming for the Deaf." The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A description of the first few swimming lessons involving a group of deaf pre-school (age 2-5) children. The setting was a deaf-oral nursery school at the Rehabilitation Center in Evansville, Indiana. Specific suggestions are included for getting acquainted with the children as well as early water adjustment.

54. Kelley, E.D. "Swimming for the Physically Handicapped." Journal of Health, Physical Education, Recreation 25: 12-13+; April 1954.

Consideration is given to teaching the physically handicapped to swim, aims and objectives of these programs, therapeutic values of swimming, contra-indications in swimming for the physically handicapped, and implications for teachers is included. More detailed information is included about the blind and cerebral palsied.

55. Lowman, C.L. Corrective Physical Education for Groups. New York: Barnes, 1928.

General information about effects of swimming on joint injuries and its place as a beneficial activity for individuals with lordosis is provided.

56. _____. "Hydrogymnastics from the Physical Education Standpoint." Journal of Health, Physical Education, Recreation 6:4: 8; April, 1935.

Focus of the article is upon the values of underwater exercise and conditions surrounding activities in the water which must be considered when planning aquatic programs. Pertinent information about effects of water on bodily action is provided; emphasis is upon corrective aspects of aquatic activities.

57. _____. Therapeutic Use of Pools and Tanks. Philadelphia: Saunders, 1952.

Written for the physical therapist, this book is essentially a collection of exercises used in hydrotherapy. All exercises are illustrated. Also included are diagrams and instructions for construction pool equipment used in the exercises.

58. Lunan, Bert. "Cottage Parents Teach Kids to Swim," ICRH Newsletter 2:8; February 1967.

A description of the organization of the swimming program at Ruston State School in Ruston, La. Unusual in this program is the training and use of cottage parents as swimming instructor aides. Included is information on their value, as opposed to the use of volunteers from outside the institution.

59. Mathews, D.K., Kruse, R., and Shaw, V. The Science of Physical Education for Handicapped Children. New York: Harper, 1962.

Values and limitations of swimming for certain handicapping conditions are discussed. A valuable contribution of this source is information on swimming for the blind which includes a complete unit plan.

60. Meehan, Daniel S. "Handicapped Swim Clinic." Journal of Health, Physical Education, Recreation, October 1970.

The author discusses the need for workshops and other in-service training opportunities for those with limited experience who find themselves working in swimming programs for the handicapped. Guidelines and materials for conducting workshops are included.

61. Meyer, J.C. "Swimming for the Deaf." Journal of Health, Physical Education, Recreation 26: 12+; May 1955.

Values of swimming for the deaf, personality problems of the handicapped, problems of balance, and relationship of swimming to the general objectives of physical education are discussed.

62. Miles, Nancy R. Swimming Techniques for Children with Learning Disabilities. Chicago: Developmental Learning Materials, 1970.

A discussion of the specific problems in learning to swim presented by the child with learning disability. Specific attention is given to the setting for the initial swim experience and teaching beginner level activities,

though the orientation of the material is toward the remediation of learning problems rather than the attainment of a high degree of aquatic skill.

63. Miller, James F., and Throp, R. Investigation of the Effects of an Aquatics Program on the Psycho-Motor Function of TMR Children. Syracuse, N.Y.: Education and Culture Center, nd.

A report of research involving 60 TMR children for the purpose of supporting the theory that swimming activity would improve psycho-motor function. Results did not significantly support the hypothesis. However, some side effects were noted in the area of ego development.

64. Mongeon, Edmond J. "Aquatics for the Mentally Retarded." New Dimensions in Aquatics. Pelham, N.Y.: Council for National Cooperation in Aquatics, 1966. (Available through the American Association for Health, Physical Education, and Recreation)

A report from a workshop at the 16th Annual CNCA meeting including sections concerning planning and organizing a community program; personnel, qualification, and training; interpretation to parent groups; program materials; facilities; and terminology. Also included are short reports: "Aquatics for the Trainable Retarded," by Isobel Lea and "Project on Recreation and Fitness for the Mentally Retarded," by Jackson Anderson.

65. Muhl, William T. "Handicapped Children Reach New Dimensions in Aquatic and Small Craft Achievement." New Dimensions in Aquatics. Pelham, N.Y.: Council for National Cooperation in Aquatics, 1966. (Available through American Association for Health, Physical Education, and Recreation)

Originally a speech at the 16th CNCA Conference this article contains a brief historical overview of the development of swimming programs for the handicapped combined with a discussion of the values of such programs. The author ends on a note of challenge to all persons in aquatics to carry on the growth of these programs and to include the handicapped in all phases of aquatic activity.

66. Murphy, Judy. "The St. Coletta Approach to Swimming." ICRH Newsletter 3:4; December 1967.

A description of the summer swim program at the St. Coletta School in Jefferson, Wisconsin. It includes a discussion of the values of swimming for the retarded as well as several activities in the water as suggestions for helping the children get adjusted to their new environment and to have fun with it.

67. National School Board Association. "Convalescents Go Swimming as Part of Red Cross Plan." American School Board Journal 111: 52-53; December 1945.

This article consists of case histories of veterans and adaptations of swimming and other activities to enable them to participate. Some important points are made about the physiological benefits of swimming.

68. Newman, Judy. "From Wheelchair to Pool: She Bubbles with Happiness and Confidence," The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A case history of a 14 year old post-polio victim. Emphasis is on the psychological benefits of aquatic accomplishment as well as the physical values.

69. _____. "Handicapped? Who's Handicapped?" Journal of Health, Physical Education, and Recreation. October 1971.

A report of the first swim meet held at Angel View Crippled Children's Foundation, Desert Hot Springs, California. This article includes not only a description of how the meet was set up and run but also suggestions on lead-up activities used to prepare children for the meet. In addition, the value of swim competition for the handicapped is discussed.

70. _____. "Swimming for the Child With Multiple Birth Defects." Journal of Health, Physical Education, and Recreation. October 1971.

The author describes a step by step progression used for teaching children with multiple congenital anomalies. Activities are described in detail, as are helpful hints regarding working with extremely handicapped and fearful students. Teaching techniques include Do's as well as Don't's.

71. _____. "Swimming for the Spina Bifida." Journal of Health, Physical Education, and Recreation. October 1970.

The values of swimming for children with spina bifida are discussed along with the skills that can be adapted to fit their capabilities. The condition itself is described and suggestions are given for hygienic controls which enable most children with spina bifida to swim in regular pools.

72. _____. "What a Difference a Year Makes," The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

Written after the first year of operation of the pool at the Angel View Crippled Children's Foundation, Desert Hot Springs, California, this article describes the gains made by children who had participated in swim patterning.

73. Panzer, Charles, "Swimming Program for Retarded is Outlined," ICRH Newsletter, April 1969.

A description of a swimming program for the trainable retarded students of the North Suburban School District, Glenview, Illinois. It concerns mainly the organization and staffing.

74. Padden, D.A. "Ability of Deaf Swimmers to Orientate Themselves When Submerged in Water." Research Quarterly 30: 214-226; May 1959.

This study was designed to determine the relationship of deafness to orientation ability when deaf subjects were submerged in water; considerations are also given to problems of the deaf-blind.

75. Fletcher, Phil. "Red Cross Learn-to-Swim Classes," The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A brief description of the swimming program for elementary special education students of the Washington Local Schools, Toledo, Ohio. How they arranged funding, transportation, facilities, as well as class organization and scheduling is included.

76. Podoll, Patricia A. "Swimming for the Rehabilitation of the Physically Handicapped." Aquatics Guide. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1967-69.

Psychological and physiological values of swimming for the handicapped are discussed. Pool facilities and teaching techniques applicable for the handicapped are also considered.

77. Pomeroy, Janet. Recreation for the Physically Handicapped. New York: Macmillan, 1964.

Included are a sample physician's recommendation form for aquatic participation, discussions of the values of swimming in general and of specific skills for certain handicapping conditions in particular, recommendations about the use of floatation devices, comments on special adjustments for the blind and deaf, and suggestions on teaching techniques.

78. "Pool Enclosure Boosts Program for Handicapped." Data and Reference Annual. Fort Lauderdale: Swimming Pool Weekly, 1972.

This article provides information on how parents and interested citizens of East San Diego County were able to obtain funds to enclose the pool at the Angels Unaware Training Center for Retarded Children. Stress is placed upon the value of swimming for the handicapped and the need for programs on a year-round basis.

79. Reese, Patricia. "The Comparative Use of Synchronized Swimming and Stroke Improvement Swimming as Recreational Therapy Tools with Selected Psychiatric Patients." Unpublished Master's Thesis. Tallahassee: Florida State University, 1962.

A study to determine whether or not the two types of aquatic activity cited could effect a change in behavior of the patients in situations outside of the pool environment. A description of the program along with the method of rating patient behavior is included.

80. Regan, Paul R. Physical Education for the Handicapped Through a Recreation Program of Remedial Sports and Social Activities, Memphis: Recreation Services for the Handicapped, 1966.

A comprehensive consideration of most aspects of swimming for the handicapped are included. Topics include: content of a well balanced program; a variety of handicapping conditions --- orthopedic disability, mental retardation, blindness, cardiac conditions; safety; stroke adaptation; values of an aquatic program. It could be used as an aid for staff training as study questions are included at the conclusion of the chapter.

81. Reynolds, Grace D. Swimming for the Handicapped. Longview, Washington: Longview YMCA, 1970.

Development on a national scale of aquatic programs for individuals with special need. Proposals, program organization including recruitment and training of personnel teaching suggestions for various kinds of handicaps, pool and facility requirements. Also bibliography of resource materials.

82. _____ "Swimming and Recreational Programing at the Longview YMCA." The Best of Challenge. Washington, D.C.: American Association for Health, Physical Education, and Recreation, 1971.

A description of the Longview, Washington recreation and swimming program for the mentally retarded and physically handicapped, sponsored by the YMCA.

83. Richards, Barbara. "Teaching the Mentally Retarded to Swim." Challenge 6:4; March-April 1971.

Discusses the four teaching approaches used teaching swimming to retarded children at the Walworth County Special School, Elkhorn, Wisconsin. They include movement exploration, station activities, one-on-one instruction, and perceptual-motor activities.

84. Richardson, Paul, Lucas, Katie. Aquatic Lessons for Exceptional Children. Elwyn, Pennsylvania: Elwyn Institute, nd.

A set of very detailed lesson plans for teaching beginning swimming to children who would tend to progress slower than the average due to various exceptionalities. Each skill is explained along with specific lead-up activities to aid not only skill development but also water adjustment. A variety of activities are included in an easy to follow step-by-step progression.

85. Robinson, Frank M., Stoddard, Mrs. C.H., and Houston, A. Basic Guide for Volunteers in Teaching Physically Handicapped Children to Swim. Boston: Easter Seal Society of Massachusetts, nd.

Included are sections on the values of swimming, teaching hints, skill progressions for beginners, and a variety of instructional ideas for volunteers and instructors.

86. Ruff, Dick. "College Volunteers Teach Our Retarded How to Swim." Motive (Ohio Department of Mental Hygiene and Correctives) 16:3; July-August 1970.

A brief description of the swimming program at Marca School in Marion, Ohio. Highlighted is the use of college students from the Kiwanis Circle K Club at Ohio State University as volunteer instructors.

87. Schoenbohm, W.B. Planning and Operating Facilities for Crippled Children. Springfield, Illinois: Charles C. Thomas, 1962.

Specific information about aquatics programs and facilities is limited to three areas: the recreational and physical advantages of swimming for cerebral palsy in children; the size, facilities and equipment needed for indoor swimming and outdoor swimming facilities; and programs in a camp situation.

88. Seamons, G. Swimming for the Blind. Provo: Brigham Young University, 1966.

This excellent source provides general information on blindness, organizing swim programs for the blind, and a detailed breakdown of swimming skills and how to modify them for individual students.

89. Shriver, Eunice. "Special Olympics," Swimming World 13:7; July 1972.

She outlines the organization of swimming competition within the Special Olympics, including grouping of entrants, special safety precautions, and the awards system. Also included are comments on the value of swim competition for the retarded.

90. Slifer, George B. "Recreational Swimming for the Physically Handicapped." Pennsylvania School Journal. 200+; January 1958.

91. Stafford, G.T. Sports for the Handicapped. New York: Prentice Hall, 1955.

This book contains a brief description of sports which are appropriate for individuals with specific handicapping conditions. Swimming is included but no definitive information is given.

92. Sterling, B. Aquatics for the Handicapped. New York: Swimming Pool Age, 1958.

The Spokane, Washington YWCA swimming program for the handicapped is described. Excellent teaching hints and information on adaptations for the blind, deaf, cerebral palsied, and post-polio patient are included.

93. Stewart, Joan E. Participation of Mentally Retarded Children in a Swimming Program. Master's Thesis. Lincoln: University of Nebraska, January 1966.

The purpose of this study was to determine the effect of a swimming program on trainable retarded children. A list of specific gains, mostly in the areas of social development and self-care skills, in addition to swim skills is included.

94. Streva, Joe. "How to Teach Handicapped Children to Swim." Parks and Recreation. 502-503; June 1966.

General teaching hints and background information on adaptations necessary for different handicapping conditions are discussed.

95. "Swimming Program for Handicapped Children Provides Recreation with Therapeutic Benefits." CHC Services Notes (Children's Health Council, Palo Alto), December 1965.

A description of the Wedde Handiswimmer program which is available to Council patients.

96. Times Education Supplement. "Where Backward Children Find Their Feet." Times Education Supplement 2616:64: July 1965.

The thesis of this article is that dull and backward children come closer to normal in performing physical skills, especially in swimming, than in mental skills. Very general case histories are presented for support.

97. Tisdale, H. "Corrective Value of Swimming." Journal of Health, Physical Education, Recreation 7: 437-439+; September 1936.

This article presents a kinesiological analysis of basic swimming strokes which stresses their corrective value. Development of the approach is based on the idea that proper execution of strokes can correct problems of body mechanics.

98. United Cerebral Palsy Association. Swimming for the Cerebral Palsied. New York: the Association, nd.

This is an excellent outline of a complete swimming program for the cerebral palsied person.

99. Weiser, Ron (editor). Swimming Manual. Pomona, Ca.: Central Service Dept., Pacific State Hospital, Box 100, nd.

Describes the aquatic program of Pacific State Hospital for the handicapped designed to meet patients' individual needs. Sections include Emergency Procedures for such things as epilepsy, shock, cramps, using the resuscitator, suggestions for the lifeguard, water games, and evaluation. Specific teaching units are included for beginners, advanced beginners, intermediate, and swimmer.

100. Williams, Marge. "Swimming for the Mentally Retarded." Journal of Physical Education 67:103-4; March-April 1970.

An overview of the teaching methods and techniques used in teaching the retarded. Also included are specific activities for water adjustment and skill development at the beginner level.

101. Wilson, G.D., Andrews, R.J. "Remedial Swimming." Journal of Health, Physical Education, Recreation 17: 70-71; February 1946.

Emphasis is upon swimming for convalescents and those in need of reconditioning exercises rather than the permanently handicapped. Information on effects of different water temperatures on the body and on various strokes in relation to joint action is especially good.

102. Weitovich, Stephen, Namy, E., and Graf, G.T. The Influences of Intelligence, Social Maturity, and Chronological Age on the Ability of Trainable Retardates to Learn Swimming Skills. Unpublished research study. Ashtabula, Ohio: Ashtabula County Retarded Children's School, nd.

The study was done to investigate pertinent factors which may contribute to the acquisition of basic swimming skills by trainable retarded children. Particular attention was given to factors of chronological age, social maturity, and intelligence.

103. Wright, Betty. "Success Breeds Success." Challenge 7:5; May-June 1972.

Outlines the organization of the swim program at the Community Association for the Retarded Center, Palo Alto, California. Contains information on program organization, as well as pool construction. Also included are the results of their study done to determine the effect of the swimming program on academic achievement.

104. . "The Wedde Handiswimmers." Journal of Health, Physical Education, Recreation, October 1970.

A description of a community oriented swimming program in Palo Alto, California. Information is given concerning the origin and development of the program as well as its current organization and administration.

105. Young Men's Christian Association. Swimming for the Handicapped. Longview, Washington: the Association, 1970.

A report of a study group presented at the YMCA 6th National Aquatic Conference. Topics included are: need for "Y" programs; program proposals; program organization; training of personnel; facilities; and teaching suggestions for various handicaps.

106. Yucker, Harold, Reoeneon, Joyce, and Fracchia, John. Modification of Educational Equipment and Curriculum for Maximum Utilization by Physically Disabled Persons: Design of a School for Physically Disabled Students. (Human Resources Study No. 8). Albertson, N.Y.: Human Resources Center, 1968.

A section deals with swimming pool construction and describes the pool at the Human Resources Center. Factors included in the description are air and water temperature, deck space, floor surface, and deck equipment.

107. Zussman, Jack. "Swimming." The Crippled Child, April 1966.

A description of the swim program at Camp Oakhurst run by the New York Service for Orthopedically Handicapped. It includes not only information on their organization, but also diagrams of their pool, specially constructed to facilitate use by physically handicapped.

Program Development

Many factors must be considered in planning and implementing aquatic programs for all handicapped persons ---

I. Objectives

- A. Aid in physical development and in maintenance of physical fitness;
- B. Provide an additional setting in which a child can learn about his environment and his place within it,
- C. Establish a social setting in which a child can interact successfully with his peer group as well as adults,
